Key Questions to Ask

To ensure you have a clear understanding of our investment services and accounts, consider asking the following questions:

Given my financial situation, should I choose a brokerage service?

- How does WallachBeth select investments to recommend? (Please note that we do not offer investment advice for our clients.)
- Make sure you have a comprehensive understanding of all fees and costs associated with your account. Discuss them with your FP to avoid any surprises.
- Inquire about your FP's experience, licenses, education, and other qualifications, and understand what these qualifications mean.

- How does your FP earn money? Our FPs receive a portion of the commission charged on each trade, which means they earn more when there are more transactions executed in your account.
- Are there any conflicts of interest your FP may have?
- Ask your FP about any regulatory issues they may have.

What fees will you pay?

- For each investment buy or sell order, you will pay a transaction-based fee, referred to as a commission, or a markup or markdown for riskless principal transactions. These fees will be disclosed on your trade confirmation.
- The decision to trade is entirely at the discretion of the investor. Please be aware that based on your decision to trade, commissions will be incurred in your account. We do not engage in recommending or soliciting trades from or to investors."
- In addition to commission costs, there will be a ticket charge assessed by the clearing firm on each transaction.
- Regardless of the performance of your investments, you will incur fees and costs. These fees and commissions will impact the amount you make on your investments over time. Please ensure you fully understand the fees and costs by discussing them with your FP.
